

Rebecca Herold, CIPP, CISSP, CISM, CISA, FLM
“The Privacy Professor”™
Information Privacy, Security and Compliance
February, 2009

Current Work

Rebecca is an information privacy, security and compliance consultant, author and instructor who has provided assistance, advice, services, tools and products to organizations in a wide range of industries during the past two decades. Rebecca is a widely recognized and respected information security, privacy and compliance expert. Some of her awards and recognitions include the following:

- Rebecca was named one of the “Best Privacy Advisers In The World” in two of three categories by *Computerworld* magazine in 2007 and again in 2008.
- In 2008 Rebecca’s blog was named one of the “Top 50 Internet Security Blogs” by the Daily Netizen.
- Rebecca was named one of the “Top 59 Influencers in IT Security” for 2007 by *IT Security* magazine.
- The information security program Rebecca created for Principal Financial Group, where she worked for 12 years, received the 1998 CSI Information Security Program of the Year Award.

Rebecca assists organizations of all sizes and industries throughout the world with their information privacy, security and regulatory compliance programs, content development, and strategy development and implementation through a large variety of tools and services. She offers a range of standard and customized one and two-day workshops including one addressing how individuals across disciplines can work together to most effectively assure privacy and regulatory compliance while efficiently implementing security controls. Rebecca is also an Adjunct Professor for the Norwich University Master of Science in Information Assurance (MSIA) program.

Rebecca has created customized 1- and 2-day training for the specific needs of many different organizations. Rebecca is the creator and editor of the “Protecting Information” multi-media security and awareness quarterly publication (http://www.privacyguidance.com/piqa_newsletter.html), an effective training event (http://www.privacyguidance.com/security_search.html) and is releasing a series of information security and privacy training modules in 2009.

Rebecca has served as a board and council member of various organizations, such as MaxMD and I’D Check, and is currently on the Norwich University Journal of Information Assurance Board of Review. Rebecca is frequently interviewed and quoted in diverse publications such as *IAPP Privacy Advisor*, *BNA Privacy & Security Law Report*, *Wired*, *Popular Science*, *CUinfosecurity*, *Bankinfosecurity*, *SearchWinIT*, *Consumer Financial Services Law Report*, *Computerworld*, *hcPro Briefings on HIPAA*, *SC Magazine*, *SearchSecurity*, *Information Security*, *Business 2.0*, *Disaster Resource Guide*, *The Boston Herald*, *Pharmaceutical Formulation and Quality*, *IT Business Edge*, *Fortifying Network Security*, *IT Architect*, *CIO Strategy Center*, *Physicians Weekly*, *IEEE’s Intelligent Systems*, *Cutter IT Journal*, *Health Information Compliance Insider*, *Baseline*, *Western Michigan Business Review* and others, including the “Privacy Piracy” California radio broadcast and the “Michigan Technology News” radio broadcast.

Projects and Work History

Since starting her own company, some of Rebecca’s projects have included the following:

- Creating a Virtual CPO and Virtual CISO service for small- to medium-sized businesses (SMBs).
- Creating Rebecca’s own branded business partner and vendor information security and privacy program assessment kit.
- Creating Rebecca’s own branded online information security and privacy social engineering online learning modules.
- Creating Rebecca’s own branded information security and privacy online practitioner tool to evaluate privacy breach response readiness assessment.

Rebecca Herold, CIPP, CISSP, CISA, CISM, FLMI
“The Privacy Professor”™

Facilitating information security, privacy and compliance success in organizations of all sizes throughout the world.

- Creating Rebecca's own branded interactive information security and privacy awareness poster and activity product proven to be effective at raising personnel awareness as well as identifying enterprise risks.
- Providing information security and privacy consulting and programs plans to an online health information management company.
- Performing an ISO 27002 and OECD privacy principles gap analysis with all the published policies (across 10 different corporate departments), updating the existing policies and creating new policies to fill the gaps and address the organization's unique risks.
- Creating and delivering highly rated and widely recommended online webinars covering information security, privacy and compliance.
- Performing 150+ vendor information security and privacy program reviews for multi-national financial organizations with multi-national vendors.
- Creating an Information Protection Assessment Kit security, privacy and regulatory spreadsheet for a large multi-national security vendor.
- Creating a next-generation, leading edge information security and privacy awareness subscription resources for organizations throughout the world.
- Performing a customer data privacy impact analysis for a large multinational publishing company.
- Performing a cross border privacy impact analysis for a large multinational services organization.
- Creating an identity verification plan and process for a large multinational financial company.
- Reviewing and providing recommendations for improving the proposed internationally applicable fraud training and awareness content for a large multi-national online learning solutions vendor.
- Creating a regulatory data dictionary for a multi-national software vendor for them to incorporate into their product, in addition to documenting the potential locations for where to find the data.
- Creating international privacy training content for a large multi-national online training software vendor.
- Evaluating existing privacy training curriculum and providing guidance and content for new internationally applicable online privacy training content and curriculum for a training vendor.
- Delivering a two-day executive privacy review to a multinational retail organization
- Creating detailed technology, organizational and operational disaster recovery and business continuity standards
- Performing security reviews for offshore data processing vendors for a multinational healthcare and financial company
- Creating procedures to support information security policies and standards for a 150,000+ employee multinational Fortune 50 manufacturing organization
- Creating customized information security online training content for a 150,000+ employee multinational Fortune 50 manufacturing organization.
- Creating customized information privacy online training content for a large multinational technology organization
- Creating privacy standards for a multinational technology organization.
- Creating a HIPAA applications security risk analysis methodology for a compliance software company.
- Creating and delivering classroom privacy training for a multinational technology organization.
- Writing The Practical Guide to Compliance and Security Risks book series for NetIQ.
- Creating an online privacy governance resource for Information Shield.

Prior to owning her own business, Rebecca was the Vice President – Privacy Services and internal Chief Privacy Officer at DelCreo, Inc. for two years. Some of Rebecca's responsibilities and experiences there included the following:

- Developed the organization's corporate-wide privacy policy and created the roll-out strategy and plan to ensure all management were aware of their responsibilities and that personnel knew,

Rebecca Herold, CIPP, CISSP, CISA, CISM, FLMI
“The Privacy Professor”™

Facilitating information security, privacy and compliance success in organizations of all sizes throughout the world.

- understood and followed the privacy policies and procedures. Included training and awareness covering applicable laws and regulations.
- Developed, implemented and managed the DelCreo privacy governance program which included controls to reduce privacy risks and to ensure appropriate access controls based upon job responsibilities.
- Met and communicated regularly with corporate leaders and management to explain information privacy and security objectives and obtain their support and commitment for information privacy and security activities, technologies and policies.
- Developed the strategy and methodology to integrate privacy standards into e-commerce applications for a large Fortune 50 multi-national organization.
- Created the privacy awareness and training strategy and implementation plan for large multinational Fortune 50 and 500 organizations.
- Created information security and privacy policies, standards and procedures for multiple Fortune 500 organizations.
- Analyzed the business associate contracts for a major Fortune 50 manufacturer and identified privacy risks and concerns and recommended ways to address the risks.
- Developed and continue to deliver a two-day “Managing a Privacy Governance Program” workshop for the Computer Security Institute.
- Performed Privacy Impact Assessments (PIAs) for a large multinational Fortune 50 and 500 technology organizations and for a large multinational Fortune 500 healthcare and financial services organization.
- Identified all personally identifiable information (PII) within multiple large multinational Fortune 50 and privately owned organizations and created a PII inventories.
- Created approximately 1000 standards statements, mapped to ISO 17799 and applicable U.S. and international laws and regulations, to support the information security policies for a large Fortune 50 multinational services organization.
- Created the information security and privacy education effectiveness baseline and evaluation methodologies for a large Fortune 50 multinational services organization.

Prior to DelCreo, Rebecca was Chief Privacy Officer and Senior Security Architect for QinetiQ Trusted Information Management, Inc. (Q-TIM) where she worked since the inception of the company as Securus in November of 2001. Prior to joining Q -TIM, Rebecca was the Global Security Practice Central Region Security Subject Matter Expert for 2 years at Netigy (which became ThruPoint in September 2001). Some of Rebecca’s responsibilities and experiences at these organizations included the following:

- Performed a financial security and privacy regulatory requirements policies gap analysis and risk assessment for a large west coast bank and mortgage client.
- Performed a Health Insurance Portability and Accountability Act (HIPAA) gap analysis and risks assessment for a large technology services vendor and their large state government client. Among the involved tasks, performed policies and procedures review and vulnerability assessment to identify gaps with HIPAA requirements. Created a HIPAA remediation plan for closing gaps and complying with HIPAA regulations.
- Provided guidance, example policies and an analysis of risks involved with handheld computing devices at the request of U.S. Air Force generals at the Air Force Research Lab in Dayton, Ohio for handheld device and PDA security.
- Created the organization’s corporate-wide privacy policy and created the roll-out strategy and plan to ensure all management were aware of their responsibilities and that personnel knew, understood and followed the privacy policies and procedures.
- Created information security policies, standards, procedures and guidelines for a large Fortune 100 multinational manufacturing organization.
- Creating information security training module content for a large Fortune 100 multinational manufacturing organization.
- Performed corporate vulnerability assessments for a number of organizations, including the State of Iowa and a multimedia entertainment organization.
- Created executive information security standards and procedures for a large multinational professional services organization.

Rebecca Herold, CIPP, CISSP, CISA, CISM, FLMI
“The Privacy Professor”™

Facilitating information security, privacy and compliance success in organizations of all sizes throughout the world.

- Created information security standards to support existing information security policies for major multinational professional services organization.
- Reorganized and updated information security policies, procedures and standards for a large multinational Fortune 100 manufacturing organization.
- Created an information classification architecture and implementation process for a large multinational communications company.
- Created comprehensive privacy awareness and training roadmap, implementation strategy, and supporting curriculum for a large multi-national Fortune 50 organization.
- Created web site privacy policies along with a privacy implementation methodology for a west coast based organization.
- Created privacy standards to be integrated into e-commerce applications for a Fortune 50 multinational organization.
- Created a comprehensive set of HIPAA security and privacy policies and corresponding quiz questions, in addition to compliance self-assessment and gap analysis tools, white papers and executive overviews, for NetIQ to use within their VPC system.
- Created a comprehensive set of 21 CFR Part 11 policies and corresponding quiz questions, in addition to compliance self-assessment and gap analysis tools, white papers and executive overviews, for NetIQ to use within their VPC system.
- Created FDA 21 CFR Part 11 compliant standards for a major multi-national pharmaceutical corporation.

Prior to joining Netigy, Rebecca was Senior Systems Security Consultant at Principal Financial Group (PFG). Rebecca began her career at PFG as a CICS systems analyst, and moved into an IT auditor position. It was at the recommendation of one of her audits that the Information Protection department was created, and she was asked to help build the department and functions. Her efforts helped PFG to be awarded the CSI Outstanding Information Security Program of the Year award in 1998. While at PFG Rebecca:

- Developed the corporate anti-virus strategy including a risk identification and mitigation process.
- Participated in new systems and application development projects to identify information security risks, then recommended and oversaw the implementation of controls to address the identified risks.
- Developed the corporate strategy to identify and control the use of modems.
- Created the Internet access strategy and the accompanying procedures for establishing and updating the Internet firewall settings.
- Developed a quarterly and yearly report analyzing and evaluating the state of information security within the organization. Distributed the report to appropriate managers and executives.
- Developed the strategy for non-employee access and risk reduction.
- Developed and established e-commerce security requirements to reduce risks in web applications.
- Created the information protection awareness and training strategy, framework and program aligned to business objectives. Rebecca included training and awareness activities covering applicable laws and regulations.
- Met regularly with corporate leaders and management to explain information security objectives and obtain their support and commitment for information security activities, technologies and policies.
- Created the organization's corporate-wide information security and privacy policies and created the roll-out strategy and plan to ensure all managers were aware of their responsibilities and that personnel knew, understood and followed the privacy policies and procedures.
- Created the corporate strategy for protecting customer information that included creating and leading a corporate group of business unit leaders to discuss the business goals and objectives for handling customer information in a secure manner that also allowed business objectives to be achieved.
- Performed an analysis of non-employee access to the corporate network and created a non-employee access strategy and policies to support the information security program while allowing necessary connections from business partners to securely be established.

Rebecca Herold, CIPP, CISSP, CISA, CISM, FLMI
“The Privacy Professor”™

Facilitating information security, privacy and compliance success in organizations of all sizes throughout the world.

Prior to working for PFG, Rebecca taught secondary school math and computer education in Missouri.

Education

Rebecca has the following degrees:

- B.S. in Math and Computer Science from Central Missouri State University in Warrensburg
- M.A. in Computer Science and Education from the University of Northern Iowa in Cedar Falls

Certifications and Memberships

Rebecca is a Certified Information Systems Security Professional (CISSP), a Certified Information Systems Auditor (CISA), a Certified Information Systems Manager (CISM), a Certified Information Privacy Professional (CIPP), and a Fellow of the Life Management Institute (FLMI). Rebecca has been a member of the Information Systems Audit and Control Association (ISACA) since 1990 and has held all board positions throughout her membership in the Iowa chapter. Rebecca is a charter member of the Iowa Infragard chapter that was formed in 2000, and a member of the International Association of Privacy Professionals (IAPP). Rebecca is also a member of ACM and of IEEE. Rebecca is currently on the Review Board for the Norwich University Journal of Information Assurance, and in the past served as a member of the Advisory Board for I'dCheck, LLC and the Advisory Board for MaxMD.

Speaking Experience

Rebecca is frequently invited to speak at conferences and seminars, and has created and delivered training workshops on behalf of the Computer Security Institute (CSI), ISACA, ISSA and customized training for a wide range of organizations. Rebecca has given presentations yearly at both CSI yearly conferences (NetSec/SX in spring and the Annual Conference in November) since the early 1990's. Some of the other organizations and events where Rebecca has also made presentations include:

- Carnegie Mellon CyLab
- ISSA
- ISACA
- IIA
- IAPP
- Infragard
- ConSec (Austin, Texas)
- Insight Information
- NetIQ (formerly PentaSafe, now Attachmate)
- Voltage
- COSAC (Ireland)
- Cutter Consortium
- Compliance Online
- Bankinfosecurity.com
- Cuinfosecurity.com
- Secure360^o™ conference
- Ethics & Compliance Officer Association (ECO) Conference
- ConnecTech Tech Expo (Kalamazoo, Michigan)

Publications

Rebecca authored the following books:

1. The Privacy Papers (Auerbach) in 2001
2. Co-authored The Practical Guide to HIPAA Privacy and Security Compliance (Auerbach) in 2003
3. The Business Executive Practical Guides to Compliance and Security Risks book series (realtimepublishers.com) in 2004
4. Managing an Information Security and Privacy Awareness and Training Program (Auerbach) in 2005
5. The Privacy Management Toolkit (Information Shield) in January, 2006
6. The Definitive Guide to Security Inside the Perimeter (Realtimepublishers) in 2006

Rebecca Herold, CIPP, CISSP, CISA, CISM, FLMI
